

2020 PROJECT FACILITIES

2020 Project Delivery Facilities, Illustrative Plan

The 2020 Project integrates new buildings, open spaces and recreational facilities within the existing campus to maintain compactness and create a sense of completion. The Existing Academic Core is extended south across Fairfield Canal. From there, mixed-use, Live-Learn clusters are aligned southwest along the southern edge of Little Lake – framing and activating this central feature, and extending both academic and residential facilities to the Town Center and the new campus entry. On the west side of campus, a new Athletic, Recreational and Wellness precinct creates continuity with the existing student housing buildings.
